Alt Doc Loans

A Declaration of Financial Status is required to be executed by all of the applicants. This acknowledges that the applicants are aware that the lender is relying on the disclosed income for debt service assessment purposes. The applicant further confirms that the information disclosed is true and correct and the loan commitment can be serviced without undue financial hardship

The level of income must support the applicant's asset and liability statement of position. In addition, Better Choice Home Loans will also determine whether this stated income and assets, and liabilities are 'reasonable', given the nature of the applicant's line of work. Better Choice Home Loans reserves full discretion as to whether or not it will accept the applicant's stated level of income and assets and liabilities. Better Choice Home Loans will not consider Alt Doc loan application where, it is readily apparent, the applicant is not declaring income for tax purposes. The applicant further confirms that the information disclosed is true and correct and the loan commitment can be serviced without undue financial hardship.

Valuation Standards

A formal valuation serves as an independent opinion of value, provides information that helps assess whether the asset is suitable security. Only an accredited Panel Valuer of Better Choice Home Loans, can value properties as security for a loan.

Acceptable Property Locations

All security locations should be checked by referencing the Acceptable Property Suburb tables available on our website at www.betterchoice.com.au for acceptable security locations, products for varying loan types and loan amounts prior to loan submission.

Ultimate Specialist & Specialist Plus only: Category 3 locations are acceptable up to a maximum loan amount of \$500k and a maximum LVR of 70%. In these locations the valuation report will need to confirm a minimum of 3 comparable sales within last 6 months, and a selling period of no greater than 6 months. This in addition to Valuer commentary, risk ratings, market data etc. within the report will be used to determine that there is an active market in this proposed location.
